

Things Used for Making the Website

Frontend Tools & Resources

- HTML, CSS, JavaScript – For building the structure and design.
- GIFs – Sourced from: <https://tenor.com/>
- Images & Text Content – Taken from: <https://pixabay.com/>
- Additional Media Resources – <https://giphy.com/explore/media>

Website Hosting

- The website is listed online using <https://www.netlify.com> — a fast and free hosting platform.

Backend / Database Integration

- Used <https://formsfree.io> to collect responses directly via email.
- This form is mainly used to receive answers like: "Does she live far from you?" or any other user input.

Page Titles Used

1. Our Story
2. The Journey
3. My Thoughts
4. A Glimpse
5. In Brief
6. My Words
7. The Idea
8. Our Path
9. The Vision
10. Just a Thought

✅ Steps to Use Formspree to Get Form Responses via Email:

Step 1:

✅ Replace `https://formspree.io/f/your_form_id` with your actual **Formspree form endpoint** (you'll get this from their website).

Step 2: Sign Up or Log In to Formspree

1. Go to: <https://formspree.io>
 2. Sign up or log in with your email
-

Step 3: Create a New Form

1. Click “New Project” or “New Form”
 2. Give a name to your form (e.g., *Contact Form*)
 3. Formspree will give you a **form endpoint link** like: <https://formspree.io/f/abxcde>
 4. Copy that and **paste it in your form’s action attribute**.
-

Step 4: Test Your Form

- Fill the form on your website and click **Submit**
- Check your **registered email inbox** — you will get the response there.

✅ You may need to **verify your email** if it is your first form.

✅ Steps to Host Your Website on Netlify:

📁 Step 1: Prepare Your Website Files

- Make sure your website is ready with all files (HTML, CSS, JS, images, etc.).
 - Keep everything inside **one main folder** (usually called dist, build, or just a named folder like my-website).
 - The main file should be index.html.
-

🌐 Step 2: Go to Netlify

- Open: <https://www.netlify.com/>
 - Click “**Log in**” or “**Sign up**” (you can sign up with GitHub, Google, or email).
-

📁 Step 3: Upload Your Website

- After login, click “**Add new site**” → “**Deploy manually**”.
 - Drag and drop your **website folder** into the upload box (or click to browse and upload).
-

🚀 Step 4: Site Deployment

- Netlify will start uploading your files.
 - In a few seconds, your site will be **live on a free Netlify domain** (e.g., yourprojectname.netlify.app).
-

📊 Step 5: Manage & Monitor

- From your dashboard, you can:
 - Upload new versions
 - Check traffic analytics
 - Manage forms (if you use Netlify forms)
-
